

Dada Says

Everyone does some work or the other. There are so few who do it in the best way they can. Those are the ones who achieve success

SVIMS NEWSROOM

Online Business Boot Camp

A three-day workshop on how to start online business was organised with Gaurav Gurbaxani and his team – Pragmites Ltd. The students came up with innovative business ideas which were first put through business canvas tests and translated on to a business webpage. Students were also taught of how to access a target customer base and use social media to actually get going with the business idea. . Many students were inspired to become

LOLA man goes to the doctor and says, "Doctor, wherever I touch, it hurts." The doctor asks, "What do you mean?" The man says, "When I touch my shoulder it hurts. If I touch my knees, it hurts- Ouch. When I touch my forehead, it really, really hurts." The Doctor says, "I know what is wrong you; you have broken your finger

Start investing in shares-Now!!!

When we initially become financially independent it is quite easy to get honey trapped into blowing away newly earned cash for parties and shopping. But as smart women of today we should also plan for our future and no time is better than today. So here are few tips for all the young women for initial investments in stock markets.

Indian stock market is viewed as an attractive investment destination and FIIs from across the world are making huge investment in Indian stock markets. However, many of us do not invest in the equity just because we just don't know how to pick the right stocks from a vast universe of 6000 stocks. Here are few guidelines to follow while picking up stocks.

Best is to start with eliminating the riskier companies. Firstly one should select only from the top 100 companies by market capitalization. Fund managers conduct extensive quality research in equities. Relying on their research, from selected top 100 companies we can shortlist a few that are present in the portfolio of top equity schemes of top mutual funds for the past one year where their percentage holding is rising . Amongst the shortlisted scrips, select ones with high return on net worth and low PE ratio. We will be left with 5 to 6 good scrips. This easy technique combines your own and fund managers' fundamental analysis of stocks.

If you want to refine your portfolio, technical charts can be used to supplement your selection. These charts show stock price movement trends. Amongst the chosen stocks one can choose scrip's which shows a continual rise with maybe a few dips. We hope this will embolden you to foray
