

SVIMS NEWROOM

As expected, January was a month of whirlwind of activities, seminars and workshops.

We are happy to announce that the International Conference on “Recountoring Business’ was a grand success.

With over 150 participants ranging from academicians, senior corporate managers to students, it had a diverse audience. Mr Suhas Kelkar, CTO, BMC software, Mr Suhas Gopinath, youngest CEO, Mr. Krishna Gopal, Global Talent Head ; Tech Mahindra, were some of the eminent personalities from corporate world. Invaluable academic inputs were provided by distinguished faculty from IIM Indore, Ahmedabad and Calcutta. Second day of conference saw participation from across the globe as Prof. Aneel Karnani, Faculty (Michigan University), Dr. Hemant Purohit-(George Mason University), Mr. Prasad-(Webex Division, CISCO, California) , also joined in for a panel discussions.

A four day workshop on ‘Critical Skills for Career and Personal Success’ was

Dada says....If you want to achieve success, you must fix a goal-and every day take at least one step in the right direction.

MECHANISATION OF AGRICULTURE IN INDIA

Historically India has been an agriculture dominant economy. But with changing times more and more villagers are shifting to cities in search of other income generating options. Although many reasons can be cited for this phenomenon, but one of the most important is ever-reducing bottom lines.

Present day need is to increase the productivity and profitability of production and post-production agriculture. Younger generation does not want to work in the agricultural field. So mechanization is the need for timeliness of operation. Effective engineering interventions and inputs have the potential to result in further useful technology packages for: Timeliness and precision in farm activity, Mechanization for dry land and hill agriculture and horticulture, efficient use of water, fertilizer, seed, pesticide, energy and other inputs. Overall contribution to employment generation in different areas of agriculture, e.g. service support, etc. for unemployed rural youth and women.

Introduction of advanced farm machines and technology can change the agriculture is looked upon by migratory youths, the concept of urbanisation will start slowing down thus reducing the burden of urban India.

LOL.....Said to railroad engineer

What’s the use of having a train schedule if the trains are always late? The reply from the railroad engineer:

How would we know they were late, if we didn't
